

BDI-3® Mobile Data Solution

The BDI-3 *Riverside Score*® Mobile Data Solution (BDI-3® MDS) allows examiners to administer the BDI-3 on-the-go using a compatible iOS, Android, or Windows device. This administration option supports any combination of the complete developmental assessment, screening test, or *Battelle*® *Early Academic Survey*.

Using the BDI-3 MDS, it only takes a tap to score any item in the administration. Upon completion of a subdomain, the examiner may review standard scores and proficiency indicators within the application. The BDI-3 MDS also supports offline administration, with automatic syncing of results back to the *Riverside Score* system once an internet connection is available.

BDI-3 MDS - Dashboard

- Available on iOS, Android, and Windows devices
