

## BEHAVIORAL DATA THAT'S JUST AS RIGOROUS AS ACADEMIC DATA

The DESSA System strengthens an MTSS framework through universal screening, assessment, and progress monitoring of social-emotional behavioral supports.

Identify students who are **4.5x** more likely to have behavioral referrals

**Gather** and **review** DESSA progress monitoring data to check for district-wide and individual student growth to **measure** program performance.

**Screen** all students with educator-completed DESSA mini and secondary grades (6-12) with student-completed DESSA SEIR.

**Integrate** DESSA Strategies and Interventions to inform universal school practices and ongoing small group instruction to **develop** social-emotional skills.

**Determine** which students need a full skill assessment to inform Tier 2 and Tier 3 **targeted supports**. Use DESSA data with attendance, academic performance, school climate surveys, and behavioral referrals data.
